Re: the construction, delivery and installation of interpretive signage

Central Signs were contracted to manufacture, deliver and install around 300 interpretive signs in remote Central Australia. The large project was complex and had many challenges. Central Signs were professional and rose to the challenges, completing the project on time and within budget.

The signs have since gained many positive comments from stakeholders including the tourism industry and traditional owners. They are of exceptional quality and I would not hesitate to recommend the services of Central Signs.

Kind Regards
