To Whom It May Concern

PROJECT: Museum of Contemporary Art, Sydney, The Rocks.

Central Signs recently completed the manufacture and install of sign work to the Museum of contemporary Art, Sydney. A high profile project, situated on Sydney's iconic Harbour.

Central Signs successfully tendered a hotly contested package, through a diligent approach by seeking clarifications prior to their submission. Due to the time constraints of the project, a pro-active approach was required from the outset and Central Signs delivered.

The resultant signs both internal and external speak for themselves. We have an exceptionally 'Happy' client as a result and the public feedback has been nothing short of exceptional. I wish to take this opportunity to thank Central signs for the outstanding work produced. The signage package was professionally handled by John and his team of production and installation staff tailoring to every need of our client's desire.

I have no hesitation in recommending Central signs for future projects.

Yours faithfully
WATPAC
